Author Index to Volume 6

Anantharaman, Siva, 79
Auffray, Yves, 1

Bibel, W., 287
Bledsoe, W. W., 341

Cantone, D., 173, 189
Cutello, V., 189

Di Piazza, Joseph S., 299

Enjalbert, Patrice, 1

Ferro, Giuseppa Carrà, 203

Gallo, Giovanni, 203
Gao, Xiaoshan, 403

Hebrard, Jean-Jacques, 1
Hsiang, Jieh, 79

Kleine Büning, Hans, 319

Lescanne, Pierre, 39
Löwen, Ulrich, 319
Lu, James J., 147

Omodeo, E. G., 173

Patel-Schneider, Peter F., 361
Plaisted, David A., 389
Policriti, A., 173
Pollock, John L., 419

Roach, J. W., 51
Robinson, Peter J., 115

Schmitgen, Stefan, 319
Staples, John, 115
Stokes, Timothy, 233
Subrahmanian, V. S., 147
Sundararajan, R., 51

Watson, L. T., 51
Winker, S., 465
Wos, Larry, 77, 211, 213, 337, 463

Yu, Yuan, 251

Subject Index to Volume 6

algorithmic reasoning, 77
alternative rings, 79
applied logic, 299
automated reasoning, 77, 211, 337, 463, 465
automated theorem proving, 79, 251, 287, 419, 465

Boolean algebra, 465
Boyer–Moore theorem prover, 251

calculus theorem proving, 341
challenge problem, 341
circumscription, 147
clause language, 21
complexity of equivalence, 319
complexity of inference, 319
connection method, 287
constrained unification, 51
constraint satisfaction, 51

decidable first-order logic, 361
decision procedures, 173, 189
differential algebraic set, 203
differential dimension, 203

equational logic, 79
equivalence of Prolog programs, 319
equivalential calculus, 213
expert-system verification and validation, 299
expert systems, 299
exterior algebra, 233

functions, 463

Gröbner basis, 233
group theory, 251

homomorphism, 251
hyperbolic function, 403

ideal, 233
inference rules, 337

kernel, 251
knowledge acquisition, 299
knowledge engineering, 299
knowledge representation, 361
Knuth–Bendix completion, 79

Lagrange theorem, 251
left ideal, 233
logic programming, 77, 115, 145
loop detection, 319

mechanical geometry theorem proving, 403
MESON procedure, 389
meta-theorem, 403
modal logic, 1
model elimination, 389
model graphs, 173
Moufang identities, 79

natural deduction, 211, 419
negation, 147
non-Euclidean geometry, 403
notation, 463
NP-completeness, 173

paradigms for automating reasoning, 211
predicates, 463
Prolog, 51
prolog inference strategy, 319
proof complexity, 287
propositional logic programs, 319

quantified terms, 115
quantifiers, 115

reasoning, 419
reduction relation, 233
relevance logic, 361
representation, 463
resolution, 1, 287
rewrite systems, 39
Ritt–Wu's principle, 403
Robbins algebra, 465

semantic criteria, 337
set theory, 173, 189

strategies, 1
structure sharing, 115
syllogistic schemes, 173
syntactic criteria, 337

term rewriting, 79
termination, 39
theorem proving, 115, 213, 389
trigonometric function, 403

unification, 51
universal algebra, 465
unsolved research problem, 77, 211, 337, 463

verification systems, 115

well-foundedness, 39
Wu's method, 403
